

Transform Your Vulnerability and Exposure Management Program

Traditional Vulnerability Management Programs are Slow and Ineffective.

Enterprise security tools generate millions of findings everyday. The volume of fragmented data from siloed scanners makes vulnerability management more complex than ever. With Nucleus, security teams can automatically prioritize risk and mitigate critical exposures, at scale. Nucleus was designed specifically to address these risks and bolster mission assurance for federal agencies by:

- **Providing a single source** of truth for all vulnerability and asset information in the enterprise, across all information systems.
- **Automate to build workflows** that effectively prioritize and mitigate risks faster, at scale.
- **Supporting federal agency controls** and requirements for compliance reporting, across control and on premises/air-gapped deployments.

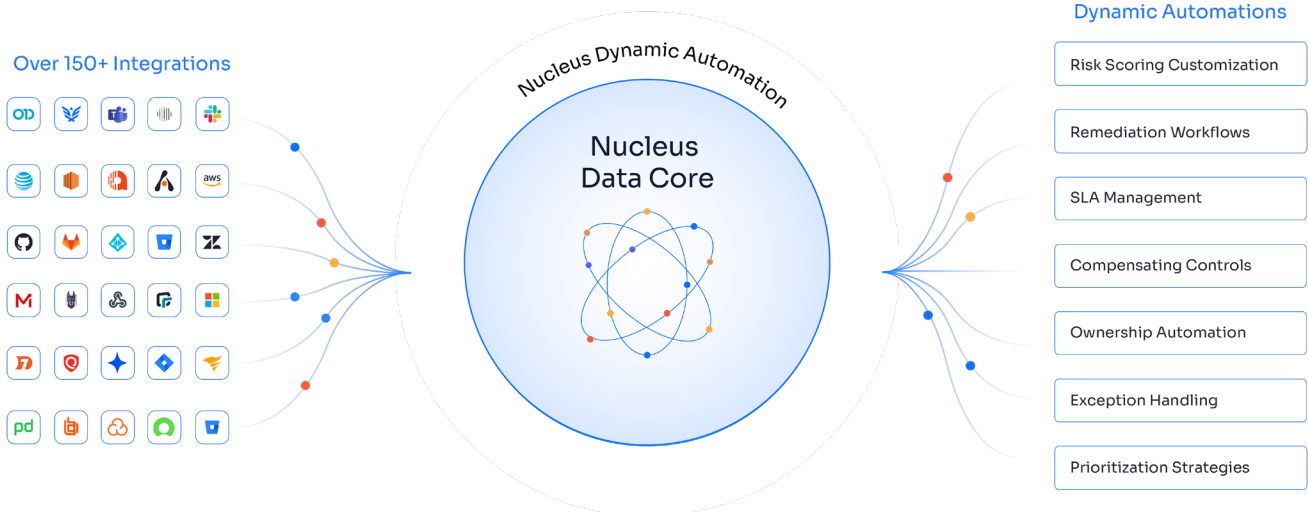

Secure to the Core

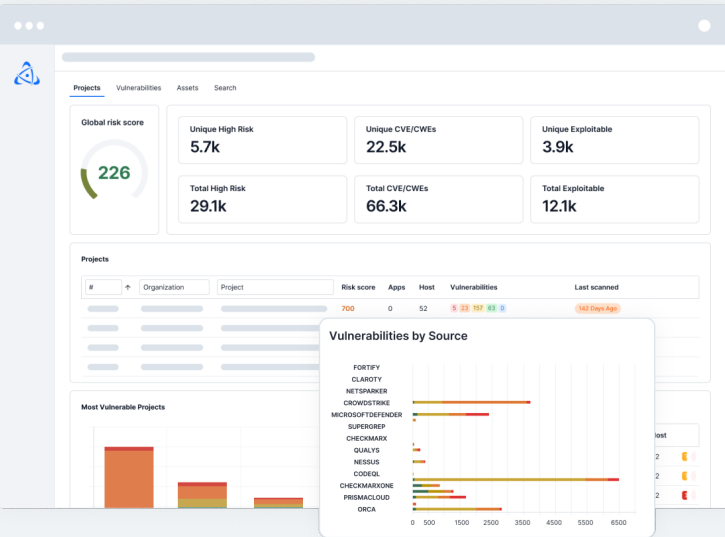

Nucleus Vulnerability and Exposure Management is FedRAMP Moderate Authorized. Transform and Modernize your program with the Nucleus Platform.

Our Technology: Nucleus Data Core

Nucleus transforms your data into: assets, findings, threat intel, users, and tickets — interconnecting them into a Data Fabric Architecture that contextualizes ownership assignment, threat risk factors, multi-layered applications, and more.

Modernizing the Way the Government Organizations Manage, Monitor, and Respond to Vulnerabilities

Centralize Vulnerability & Asset Data for Every System

Aggregate, compartmentalize and manage all vulnerability and compliance data for every system, fiefdom and silo.

Automate Reporting & Assessments

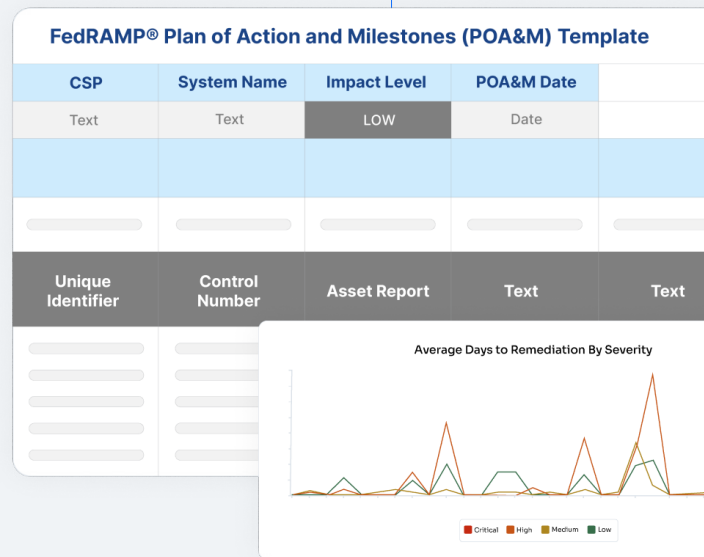

Generate the reporting and insights needed to demonstrate compliance with federal security controls.

POA&M Process Automation

Nucleus automates tracking, reporting, and compliance—reducing manual effort and errors. Stay compliant with NIST, FedRAMP, and CISA requirements and focus on what matters most: securing your systems.

Fuse Threat Intelligence with Vulnerability Scans

Fuse commercial, public and private cyber threat intelligence with your vulnerability data.

See Nucleus in Action

Nucleus Security is the enterprise leader in vulnerability and exposure management. The Nucleus Security Platform enables organizations to prioritize and mitigate vulnerabilities faster, at scale.
